

RELAXSAN COMPRESSION COTTON SOCKS

Description

Relaxsan Compression socks are designed for compression therapy. They apply graduated gentle pressure to the ankles and legs, promoting blood flow from the legs to the heart. Compression socks can also reduce pain and swelling in the ankles and legs.

Features

- Mens knee sock with graduated compression.
- Fine cotton at skin contact. Comfortable and soft elastic knee hem.
- Reinforced and anatomical heel and toe.
- Odourfree
- Regain compression after washing

Benefits of compression socks

- boosts circulation in the legs
- supports veins
- prevents blood from pooling in the leg veins after long standing
- reduces leg swelling after long sitting
- reduces orthostatic hypotension, which causes light-headedness or unsteadiness when a person stands
- help prevent venous ulcers
- prevents development of deep vein thrombosis in the legs
- helps lessen the pain caused by varicose veins
- reverses venous hypertension
- improves lymphatic drainage

Recommended for

- Professionals who stand for more than 4 hours a day
- Healthcare professionals
- Prevention and alleviation problems caused by venous disease
- Frequent travellers
- Patients with leg fatigue and leg tiredness
- Also useful as Sport Recovery Socks for faster recovery from a workout

Specifications

Cotton Knee High Socks with graduated compression, available with the following compression specifications at the ankle

18-22 mmHg- Class I

Code	820
Detail	Toe without seams
Sizes	from 1 to 6
Colors	Black Blue
Composition	57% CO - 32% PA - 11% EA
Length	Knee

22-27 mmHg- Class II

Code	920
Detail	Toe without seams
Sizes	from 1 to 6
Colors	Black Blue
Composition	53% CO - 31% PA - 16% EA
Length	Knee

Unique textile production process

Compression socks are produced with Elastane Lycra double covered, to assure a strong resistance and to avoid the direct contact of the elastic fiber to the skin. More safe and comfortable. The standard features of the textile production process, which includes the employment of selected yarns and effective production methods resulting from long experience in this field, guarantee:

- Elasticity
- 4-way stretch
- Fabric elongation
- Durability
- Comfort and wearability
- Shape-memory effect
- Double covered yarn

Certified quality- 100% MADE IN ITALY

Product and System certificates

- Certified graduated compression in compliance with the officially defined and recognized medical standards, both Italian and international.
- Proven efficacy.
- Effective, repetitive, permanent and extended results.
- Anatomical shapes obtained during the production process, which prevent the product from being too much tight on knees and thighs.

Guaranteed pressure measurement

Compression efficacy and elasticity potential translating to durability is measured with the use of sophisticated machines providing the ideal compression stocking for each relevant medical indication . With the aid of its state-of-the-art machinery, Calze GT is able to analyze and test compression on all types of graduated compression items.
